STOVES 2016 - 2017

THE GALLERY

WELCOME TO THE GALLERY COLLECTION

The Gallery Collection presents an extensive range of traditional and contemporary stoves, combining supreme craftsmanship, quality materials and elegance in design.

There's nothing quite like the feeling invoked by the comforting glow and warmth of a cast iron stove. Our desire is to provide you with a superb choice of high performance, efficient stoves that are skilfully made with high quality materials.

Featured within this brochure is a range of stoves suitable for many scenarios and fuel types such as wood, gas or multi fuel. You'll find stoves with a variety of heat outputs ranging from 4.6kW to 12kW and with efficiencies of up to 83%.

As well as our continuing development of innovative stoves, this year we've also added further options to our range of authentic fireplace chambers, hearths, stoves, and fireplace accessories, allowing you to create that perfect focal point to your living space.

Most of the fireplaces within this brochure (items such as hearths, chambers, beams and surrounds) are part of the Gallery Collection and can purchased along with your stove.

For more information on these items and many more, please ask your dealer for our other Gallery Collection brochures: FIREPLACE SUITES & FIRES and MANTELS & CAST IRON FIREPLACES.

CHAMBERS

BEAMS

Updated Geocast Oak Effect Beams - The realistic oak effect fireplace beams now look even more realistic than ever before and are available in light and dark oak effect. Available in three sizes, they are lightweight and moulded from three separate natural oak beams. Newly developed, the material is composed of natural inorganic minerals, and is non-toxic and unburnable offering many advantages over wooden beams. They are available in 36" 48" and 54" with concealed feature lights available as an option for the 48" and 54" versions.

HEARTHS & BEAMS

HEARTHS

With such a varied range of hearths and beams, we make it easy for you to create a truly unique fireplace. We offer a variety of hearths in many shapes and sizes and suitable for use with all fuel types. Please consult with your nearest Gallery dealer to determine the correct hearth specification for you.

GLASS & GRANITE HEARTHS

These high quality glass & granite hearths are a contemporary alternative to complement any multi fuel or wood burning stove.

The glass hearths are constructed from 12mm toughened glass and are available in smoked or transparent glass. The granite hearths are constructed from 20mm natural black granite and are available honed or polished. There are four shapes available to choose from:

STOVES AT A GLANCE

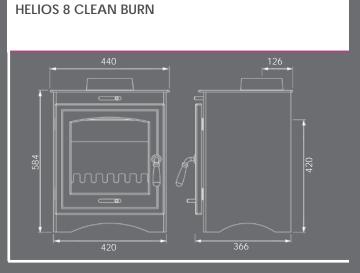

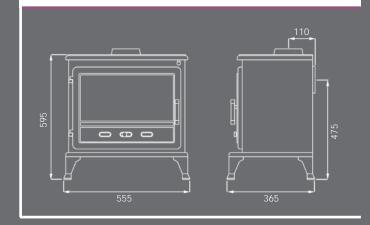

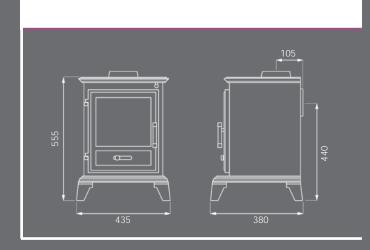

FIREFOX 8.1 MULTI FUEL, FIREFOX 8.1 CLEAN BURN FIREFOX 8 TD

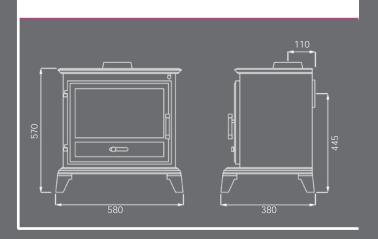

* MEASUREMENT INCLUDES REAR FLUE DIVERTER BOX

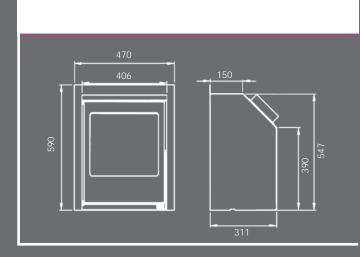

CLASSIC 5 CLEAN BURN

CLASSIC 8 CLEAN BURN

HELIOS INSET

All dimensions are in mm. Due to manufacturing processes, all measurements are approximate and may vary slightly. Please allow for a tolerance of plus or minus 12mm.

The Firefox 5 Gas, Firefox 8 Gas, Tiger gas, Tiger Inset and Helios Inset stoves are all top flue only. All other stoves have the option of top or regr flue

The Tiger Gas and Firefox 8 Gas models have a 150mm flue collar but require a 125mm flue. The collar should be packed with rope/fire cement or sleeved with a 6" vitreous pipe to finish.

It is essential that your stove is installed in accordance with Building Regulations and any other standard requirements by a competent person with experience in fitting fireplaces - your retailer will be able to help you select an appropriately qualified installer.

STOVE INFORMATION

CHOOSING YOUR STOVE

There are many factors that will determine which is the ideal stove for you. Luckily we have a variety of stove types to ensure there is an option to suit your particular needs.

MULTI FUEL

If a stove is specified as multi fuel then it can burn a number of different fuel types including wood, coal, coke, peat, anthracite and smokeless

CLEAN BURN

Some towns and cities of the UK are designated SMOKE CONTROL areas and prohibit the burning of smoke producing fuels such as wood. In such circumstances, stoves can still be used if they burn smokeless fuels or gas. However, if you live in a smoke controlled area and still want the freedom to burn wood you can use a DEFRA approved CLEAN BURN stove. These stoves are specially designed to burn wood whilst producing lower smoke emissions. For information on smoke controlled areas visit the DEFRA website www.smokecontrol.defra.gov.uk.

To help you decide we've put together a table below so you can compare the features and specifications of each stove in the Gallery Collection. Don't forget, your retailer can is on hand with helpful advice to assist you with your decision.

CARE & MAINTENANCE

GENERAL INFORMATION

All Gallery stoves are manufactured from cast iron and it is vital that appliances undergo a period of 'burning in'. This involves small fires initially and then gradually increasing in size with each firing. If this process is adhered to then you should experience years of trouble free and, enjoyable use.

All Gallery stoves are CE approved to EN13240 and are suitable for use with a variety of fuels such as wood, coal, coke, peat, anthracite or smokeless fuels.

For safety all Gallery solid fuel stoves are supplied with a heat resistant mitten, as the stoves are very hot when being used.

Most stoves have a riddling grate mechanism to ease de-ashing. Ensure that all ash is removed from your solid fuel stove (once cooled) on a regular basis. It is important that a build up of ash is not allowed to occur as this will affect the life of the consumable parts within the burning chamber.

Except for the Tiger Inset, all other Gallery solid fuel stoves can be top or rear flue exit, gas stoves are top exit only.

Gallery stoves (excluding gas) utilize an 'air wash' system which helps to keep the large viewing glass clean during operation and improve efficiency.

Your Gallery fireplace is made up of a number of different components and it is important to ensure that your installer has the necessary qualifications and experience to fit ALL the components of a fireplace.

All gallery stoves are supplied with detailed, comprehensive installation and user instructions.

It is critical that ALL installations conform to relevant Building Regulations and should be carried out by a qualified Gas Safe Register registered installer when fitting a gas stove, or a HETAS qualified engineer when installing for use with solid fuel. Failure to comply with these requirements may reduce the efficiency and serviceability of your appliance and will invalidate any guarantee. It is essential that prior to any installation, a relevant qualified engineer verifies the proposed site, location and conditions are suitable for the stove selected.

All installations must be carried out in accordance with the requirements set out in the Building Regulation documents, in particular Approved Document J. Independent bodies have been approved to carry out installations in accordance with these regulations. For gas installations the most recognised independent body is GAS SAFE REGISTER (Board Gais in ROI) and for solid fuel installations it is HETAS. Please confirm with your retailer that your new fireplace will be installed appropriately. A CO detector must be installed with all solid fuel appliances.,

If your new fireplace is fitted by a GAS SAFE REGISTER (Board Gais in ROI) or HETAS registered fitter you will be given a certificate stating that your installation has been carried out in accordance with the Building Regulations. If you do not have one of these certificates then you must arrange for your local Building Control Officer to inspect your installation and approve it.

There are occasions when designs or products are altered or discontinued without prior notice (a reserved right). Please consult your retailer before making your final choice.

UNDERSTANDING YOUR GALLERY STOVE

CAST IRON

Do not use a water-based cleaner or polish to clean cast iron products.

There are some very high temperature burning fuels which can cause damage to any fireplace. Please refer to the Solid Fuel Association (www.solidfuel.co.uk) recommendations and use an approved coal merchant as your supplier.

No responsibility can be accepted if high temperature fuels have been used or if there is excessive draft. Clean ash away regularly as a build up beneath the fire will cause the grate to burn out quickly. The grate is a consumable part of your fire and will need replacement from time to time, depending on the frequency and burning temperature of your fires.

GAS STOVES

A gas stove is a technical piece of equipment and needs regular servicing. Ensure that you have your gas stove serviced regularly by a Gas Safe Register (Board Gais in ROI) registered installer.
