**HOLD THEM UP AND SEE FOR YOURSELF
DISCOVER WHICH DIMENSION SUITS YOUR HOME**

The see-through sheets in this brochure enable you to picture each Valor Dimension fire in your home.
Simply hold up each sheet at a suitable distance from a wall to see how each model would look.

“ The Valor Dimension range is redefining the market for fuel effect fires. Using cutting edge technology, we have created a slim and compact design with an unbelievable full depth fuel bed; a truly unique offering within the fireplace market. With stunning designs, the Valor Dimension range provides convenience and warmth economically, to meet the needs of today’s discerning consumer. This is all backed by the quality, reliability and peace of mind one would ordinarily expect from the leading name in home heating. ”

Chris Chapman, Managing Director, Valor Fires

“ Valor has been bringing new design ideas and technological advances to people since 1890 and as an integral part of Baxi Heating UK, is a clear example of a Baxi Group company ‘delivering the spark’. The Valor Dimension range is one of the most exciting innovations yet. It really is a revolution in fire technology. ”

Martyn Coffey, CEO, Baxi Heating UK

Please note that our policy is one of continual improvement and while every effort is made to accurately reproduce information and images, we reserve the right to change specification without prior notice. The brochure cannot be regarded as infallible and as such does not constitute an offer for sale of the particular fires shown within. Please refer to the installation instructions for more detailed information.

Don't just take our word for it...

“To be honest I'd forego my gas flame for that, I wouldn't get a draught from this fire and it isn't going to get dirty at all.”

“It's far superior to what I'd have expected an electric fire to be.”

“Forget everything you've ever known about electric fires.”

“I think they're a longstanding company and I would say they're one of the top companies for that sort of product and we would look at that and know it was good quality.”

“I'd have to say the fuel bed looks better...you might ask 'is that fire real?'”

THIS RANGE IS UNIQUE

Valor Dimension will change the way you view fuel effect fires forever, offering you an unrivalled degree of realism. It will give you all the warmth, comfort and visual appeal of a real fire and all the benefits of electric – including the economy, simplicity of installation and all year-round ease of use.

Valor Dimension fires have been designed to look at their best when fitted flat against a wall. Many fire surrounds have a 3" space that helps to make sure the fire is perfectly positioned. If your fire surround doesn't have this space (or if you don't have a fire surround), we can provide an additional 3" spacer kit (part number 0584081) to help you to position the fire perfectly. For the Valor Dimension Innova model we can also supply an elevated installation kit (part number 0584091) that enables you to fit the fire off the floor, up to 240mm from the floor.

From July 2007 all electrical equipment has to comply with the Waste Electronic and Electrical Equipment Directive (WEEE). This means that manufactures pay for their products to be recycled, retailers collect and dispose of replaced products or the product owners dispose of the equipment responsibly. Look for the WEEE symbol – a crossed-out wheelee bin – on any electrical equipment you buy. Your local council's recycling centre should have an area dedicated to electrical equipment. Valor is registered under the WEEE Directive (WEE/AC0083UX).

This brochure is your introduction to the unique Valor Dimension range of fires. Stylishly designed and technologically advanced, each fire gives you the opportunity to enjoy all the warmth and atmosphere of a real fire effect in your home simply, cleanly and quickly. To see the unrivalled realism of the effect for yourself, visit your local Valor Centre now.

You can find out more, including the location of your nearest Valor Centre on our website:

www.valordimension.co.uk

As with every product from Valor Fires, the Valor Dimension range is backed by heateam, Baxi Heating UK's state of the art customer service division which provides service support for products long after they leave the factory. Its team of experienced service personnel are on hand 6 days a week, 363 days a year. Installers and customers alike will also be reassured by the fact that every fire produced in Valor Fires' Birmingham plant is tested before it leaves the factory.

The secret of the real fire effect lies in the patented combination of Valor Dimension's innovative fuelbed and 'flames' that appear as if they are emerging from the heart of a real fire. The crucial elements of a real fire have been replicated; glow, so that the fire communicates warmth; authentic flame effect, providing colour and movement and; fuel-effect depth.

Until now, fuel-effect fires have been 2-dimensional. Valor Dimension delivers all elements to fantastic effect, but is truly unique in that it presents the third dimension – Depth. The result is a full depth real fuelbed, giving the impression that the fire is double its actual depth. What's more, Valor Dimension is a highly practical slimline fire, allowing simple home installation.

It's a totally new way of enjoying the atmosphere and magic that only a real fire can create – at the press of a button.

The Classica Pewter fire distils established architectural cues into a familiar but simplified 'modern classic' aesthetic. This allows the design to be equally at home in both contemporary and more traditional homes. This quality fire balances the highest technology with a traditional sense of permanence through its solid cast iron fascia and use of authentic handfinishing and honest materials.

CLASSICA PEWTER

The Classica Brass fire takes a more traditional stance combining elegance with grandeur to create a de-cluttered design with a historical signature. It will find favour and attraction in a range of home environments. A high quality fire, it showcases cutting edge technology and abiding beauty – from its solid cast iron fascia with plating, to the faithful finishing and hand craftsmanship.

CLASSICA BRASS

The Innova fire is based on purity of form and quality of materials. The elegant glass and silver fascia aptly suggests that it conceals new technology. By capturing the realistic coal effect behind the black glass it offers a style statement switched on or off. Whether you mount it off the floor or in the hearth, the effect is the same: a focal point for your room that is extraordinary.

Fitting a Valor Dimension fire is quick and easy. Take it out of the box a few simple checks, plug it in and you're ready to go!

The slimline casing means you can fit a Valor Dimension fire into surprisingly small spaces. Yet, the technology means that you see the full depth effect you'd expect from a real fire.

Every Valor Dimension fire comes with a handy remote control, making it easy to adjust the heat output from the comfort of your armchair. It's designed to be easy to use and offers the following features:

- On / off on handset
- Fuel effect only (no heat)
- 3 heat settings
- Or, manual control on the fire.

PLUG IN, SWITCH ON

Product	Fascia height (mm)	Fascia width (mm)	Fascia depth (mm)	Max heat	Thermostatic control	Remote control	Running costs effect only	Running cost on max
